

Congressman Westerman Tours Martin Marietta, Cranford

On April 12, 2017, Congressman Bruce Westerman toured both the Martin Marietta quarry and the Cranford Construction asphalt plant in Jones Mill, AR. After the tour, the Congressman spoke to the plant employees and took questions. Much thanks to Cranford Construction and Martin Marietta for hosting this event.

We are fortunate to have Congressman Westerman on the Transportation Committee in Washington. Our goal is to host every Arkansas Congressman and Senator on a tour such as this in the near future. We want them to see up close the technology, equipment, planning, expense, and jobs our industry utilizes.
